Ergonomics Meets Curved Displays in Bank Relocation

DÜSSELDORF, GERMANY

A global bank planned to move into a new office building with approximately 35,800 m² of space. They knew they wanted to keep ergonomics and employee well-being top of mind as they looked to design the new work area.

With large, curved displays rising in popularity, they also wanted to outfit nearly 1,600 workstations spread across six floors with sleek, yet quality monitor arms for 32-inch monitors.

They chose Ergotron's MXV Monitor Arm for its slim design that allowed more usable workspace across the bench solutions and individual workstations. The easy screen adjustment supported comfortable postures and an ergonomic screen height tailored to each person.

Ergonomic Working for All

Now with the 1,600 monitor arms in place, bank employees can enjoy a comfortable and productive workday with their curved displays in a modern facility.
